

StraPack D-53HE2

SEMI-AUTOMATIC STRAPPING MACHINE

Compatible with PP Strap

Easy height adjustment

Versatile tension capability

Simple operation with innovative pendant switch

The StraPack D-53HE2 is designed to apply horizontal straps to palletised goods quickly and economically. The machine is suited for lower volume of packaging and is faster than using hand tools or buckles.

FEATURES & BENEFITS

Easy Height Adjustment

Strapping height is quickly adjusted using the easily operated counterbalance that moves smoothly and effortlessly to the desired strap location

Simple Operation

The innovative pendant switch allows operation of the machine from either side of the load while enabling the operator to control the feeding, tensioning, and sealing of the strap with one hand. Operator control makes positioning of the strap and/ or the placement of corner protection an easy task.

Versatile Tension Capability

Manual Tension or Automatic Tension are available by means of a simple selector switch

Manual Tension Mode:

The strap tension can be controlled manually via the Operation Arm, allowing edge protection to be secured to the pallet prior to strap completion.

Automatic Tension Mode:

Strap tension is applied automatically at a preselected level.

Dimensions	Width	1230 mm
	Depth	700 mm
	Height	2830 mm
	Weight	160 kg
Package Height	170 - 2210 mm	
Joint / Strap / Coil	Heat seal / Polypropylene ID 200 X W 200 mm	
Strap / Width / Thickness	5, 6, 9, 12 (15.5) mm	
Strap Tension	Max 690N (70kgf)	
Power Supply	110, 120, 220, 230, 240V Single Phase 50/60Hz 0.4kVA	

Battery operated version is also available.
