

SAVING MPS

SEMI-AUTOMATIC STRETCH WRAPPING MACHINE

Table Ø 1650mm, 6mm plate, for pallets up to 1200x1000mm

Capacity: up to 20 pallets/hour depending on load size

Wrapping height: up to 2200mm (incl. pallet)

Max. weight: 2000kg

The Saving MPS is a semi-automatic turntable power stretch wrapping machine for general industrial applications. The power pre stretch film carriage enables film to be applied at a constant and easily adjustable tension.

FEATURES & BENEFITS

Powered Film Carriage for Pre-Stretch System

Up to 250% - suitable for power-stretch film

4 Wrapping Programs

Single, cross wrap, cross-plus, full independently adjustable top and bottom reinforcement wraps
Reinforcement wraps at any point in the cycle

Wrapping Cycle Counter	Adjustable vertical film carriage speed
Adjustable Rotation Speed Delay	Top of pack overlap control
Microprocessor Controlled	Display control panel
Ergonomically Designed Control Panel Option	Ramp, Pit Frame, Hold Down Device (motor driven)
Photocell for automatic height detection	Soft start and stop by frequency inverter, with return to start position

Film	Stretch Polyethylene
Film Thickness	17-35 micron
Film Width	500 mm
Rotary Table Height	1650 mm
Pallet Height	Up to 2200mm
Pallet Dimensions	Up to 1200 x 1000 mm
Pallet Weight	Max 2000 kg
Power Supply	240V, Single Phase, 50Hz
Power Consumption	1.2 kw

Gordian House, Brunel Road, Houndmills Industrial Estate, Basingstoke, Hampshire RG21 6XX, UK.
