HAND STRAPPING TOOL

Compatible with PP and PET strap

Quick and easy to use

Superb build quality

Siat battery-powered tool

Our friction weld battery tools, which can be operated with one hand, feature the latest generation Li-Ion batteries. They are compatible with PP or PET strap and are available with semi-automatic or automatic operation.

FEATURES & BENEFITS

Adjustable tension force and
sealing time

The tension mode and sealing time can be easily selected by the operator. This allows you more versatility and flexibility with your strap, depending on your product.

Economical

This tool is perfect for those looking to save on costs. Whilst it doesn't provide anywhere near the same output as a strapping machine, it is a great value item for smaller businesses.

Extreme durability

Our hand-strapping tools are built to last, and have excellent durability even when used daily.

Optional Extras

You can add suspension plates for your tool, as well as wearing plates which are excellent for rough surfaces

Spare Battery & Charger Available

Make sure your tool is always available by purchasing a spare battery and charger.

Strap Width	10 mm, 13 mm and 16 mm
Strap Thickness	0.5 - 1.1 mm
