

GORDIAN
STRAPPING

StraPack RQ8-CSD

Fully Automated Strapping Machine

Squares, bundles and straps

Speeds of up to 30 bundles/min

Easy operation and low maintenance

Designed specifically for the
corrugated industry

Designed specifically for the corrugated industry, the RQ8-CSD squares, bundles and straps up to 30 bundles/minute.

Features and Benefits

Increased Productivity

Straightens and straps up to 30 bundles/min with an adjustable conveyor speed of up to 60 metre/min (196 feet/min).

Quality Bundles

The bundles are squared from all sides, strapped straight, eliminating additional operator handling at the load building station and improving throughput.

Detachable

The RQ8-CR/FR strapper can be removed from the RQ8-CSD host machine. Another RQ8-CR/FR could be inserted in its place to increase up time during planned maintenance. Alternatively, the RQ8-CR/FR can be used as a stand-alone strapping machine.

Simple Operation

Straightforward programme set up and data access via touch screen interface. Quick and easy coil changes via strap self-loading and end of coil strap ejection system.

Dimensions	Width	3220 mm
	Depth	1850 mm
	Height	2000 - 2680 mm
	Weight	850 kg
Arch height	W 1650 mm x H 500 mm	
Conveyor height	710 - 1390 mm	
Min package size	W 200 x H 120 mm	
Max package size	W 1590 x H 430 mm	
Air requirements	31.7 l/min (ANR) / 0.4MPA (57psi)	
Strap width	5, 6 mm as standard	
Strap tension	Max 392N (40kgf), 150mm Stroke	
Power supply	200-240V 380-480V	

Gordian House, Brunel Road, Houndmills Industrial Estate,
Basingstoke, Hampshire RG21 6XX, UK.
